About the Company

WaveLine Industries is in the business to innovate and delight its customers. We are determined to deliver excellence in every single product that we bring to market. We currently offer solutions in the air bubble packaging and thermal insulation space.

Vision

“To make WaveLine a symbol of Excellence and Innovation. To be the industry leader in protective packaging and thermal insulation sector”

We are consistently looking to innovate our products and processes to serve our customers better and provide the best-in-class solutions.

Mission

“To build a sustainable future”

Basing our choices of today thinking about tomorrow has always been our approach to do business. Practices such as in-house recycling of waste generated; strict compliance with pollution guidelines and many more shows our commitment towards our mission.

Infrastructure

WaveLine is one of the few manufacturers in India offering 5-layer air bubble packaging and thermal insulation solutions. With a strong infrastructure of 20,000 sq. ft. manufacturing facility with in-house fabrication capabilities and stable base of factory workers, we are able to offer quality consistent products. Our manufacturing facility is as clean as a kitchen to ensure highest quality and dust free production of your packaging material.

Air Bubble Packaging (Upto 5-layer; Anti-static; Biodegradable)

Rolls

- Slit to varying widths within 2 mtr
- Delivered in custom roll lengths
- Perforated to custom tear-off lengths

Pouches

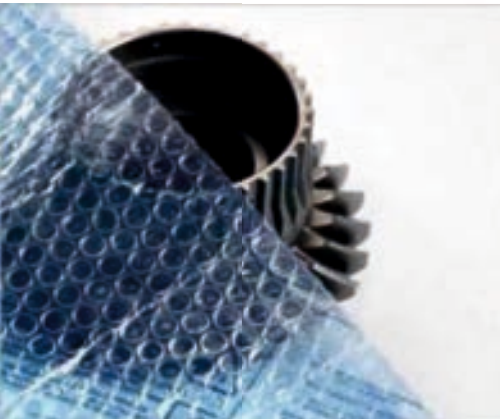

- Flush cut bubble pouches
- Available with or without self-seal lip

Cut-sheets

- Customized sizes as per requirement
- Laminated options available

EP Laminated

Reflective Thermal Insulation

CoolWave Pro

- Available width : 1250mm & 1500mm
- Thickness : 4mm
- Reflectivity : 97%
- Emissivity : 3%
- R-value : 3-21 (depending on application)
- Operating Temp : -50 °C to 110 °C (-58 °F to 230 °F)

CoolWave Pro Max

- Available width : 1250mm & 1500mm
- Thickness : 8mm
- Reflectivity : 97%
- Emissivity : 3%
- R-value : 3-21 (depending on application)
- Operating Temp : -50 °C to 110 °C (-58 °F to 230 °F)
